

Zoological Research call for special issue papers

Special Issue in 2019 for the Celebration of the 60th Anniversary of the Kunming Institute of Zoology & the 70th Anniversary of the Chinese Academy of Sciences

Established in 1959, the Kunming Institute of Zoology, Chinese Academy of Sciences (KIZ, CAS) is a comprehensive research institution in the field of biodiversity evolution, conservation, and sustainable utilization in China. Dominant research areas include Genetics and Evolution and Primate Animal Models and Disease Mechanisms. Based on the rich biodiversity resources of China and Southeast Asia, KIZ aims to be at the scientific forefront of the “cross-unification of genetics, development, and evolution”, and to help tackle the national demand for the exploitation of animal genetic resources and the creation of animal disease models. Through multi-discipline integration, KIZ is focused on basic, strategic, and advanced scientific and technological issues in the study of biodiversity resource conservation and utilization in relation to national and regional development.

Established in 1980, *Zoological Research* (ZR) is a bimonthly publication produced by KIZ, CAS, and the China Zoological Society. ZR is now indexed by Science Citation Index Expanded (SCI-E), PubMed/MEDLINE/PubMed Central, Scopus, and others. To celebrate the 70th anniversary of the founding of the People's Republic of China, and to commemorate the development of disciplines within KIZ, ZR plans to publish a special issue entitled “Celebration of the 60th Anniversary of the Kunming Institute of Zoology & the 70th Anniversary of the Chinese Academy of Sciences”. We sincerely welcome any related contributions from you and/or your research teams. Details are as follows.

1) Contribution scope and requirements

We would like to invite you to contribute a review/research article focusing on Animal Genetics and Evolution, Animal Diversity and Protection and Utilization, and Primates and Animal Models. All contributions to the special issue will be fully refereed according to the usual standards of the journal. Deadline for the special issue is 31 July 2019.

2) Contact us

Prospective authors should submit papers using our online submission system (<https://mc03.manuscriptcentral.com/zr>). Journal submission guidelines can be found on our web site (<http://www.zoores.ac.cn/EN/column/column117.shtml>). Authors need to specify the title of the special issue in the subject and in the cover letter of their submission. Any questions concerning whether a manuscript is appropriate for this special issue are welcome.

We appreciate your support and thank you for your contributions.
